

# **Result<sup>®</sup>**

**GENUINE RECYCLED**

*For people and planet*

# IT IS GENUINELY RECYCLED.

Understated and stylish, our **RECYCLED** collection combines simplicity of design with clean lines and contemporary recycled fabrics that are beautifully textured and remarkably individual.

By working with speciality fabrics made from recycled plastics, industrial waste and materials, the **Result®** commitment to reduce plastic in landfill continues. We produce sustainable, ethical garments whose yarn production gives off fewer emissions and consumes less energy and water than the production of conventional yarns. We aim to 'close the loop' using fabrics that can be chemically or mechanically recycled back into textile fibres and constantly review those materials classed as non-recyclable. Garments in this range are designed to be readily recycled at the end of their usable life and made from as close to 100% recycled materials as possible; every hat in the range is made from 50% recycled materials.

**Result®** works with certified partners **PERPETUAL®**, **TOPGREEN®**, **REPVEVE®** and **JIAREN®** to create fibres made from recycled plastic and waste polyester fabrics, allowing **Result®** to calculate, based on a single size L garment, the number of equivalent 1L bottles that would have been sent to landfill.

The yarn spun from these fibres is sent to a certified mill to weave or knit fabric for the **Result®** Genuine Recycled range. As with all **Result®** products, each aspect of manufacture and practice has been checked to meet our high standards for a respectful, secure work environment with reasonable hours, good wage and work conditions for all staff. **Result®** ensures the supply chain is traceable to prove the origin of garments.

Our clear labelling engages customers to buy, use and dispose of clothing to reduce climate impact and resource use.

**Recycled SAFE-GUARD** garments welcome early nightfall in styles to lift your safety and brighten dark working conditions, adding layers, texture and warmth to roadside visibility. The inks used to transfer reflective print on our recycled safety range are water-based, so more eco-friendly than traditional plastisol-based inks.

Our goal is to increase the use of recycled materials in our ranges to help reduce the release of plastic microfibres during the laundering of virgin polyester garments. So watch us grow: since its introduction in 2020, **Result®** Genuine Recycled has stopped the equivalent of over 9 million 1L bottles from going to landfill.

# REDUCING LANDFILL AND POLLUTION IN OUR OCEANS

Made into **Result®**  
Genuine Recycled  
garments

Post-consumer PET  
recycled plastic bottles  
and waste

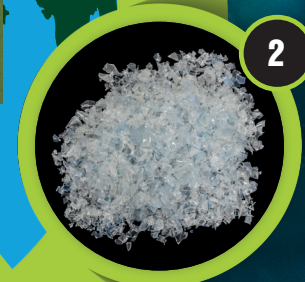

**Result®**  
GENUINE RECYCLED

Fibres are spun  
into sustainable  
recycled yarn,  
knitted or woven  
into fabric

Shredded flakes are  
processed to create fibre

Post-consumer  
plastic gets  
shredded into  
flakes

Connect with **Result®** Genuine Recycled and improve your Corporate Social Responsibility

- Reduce plastic in landfill • Protect against soil contamination
- Prevent air pollution • Reduce release of plastic microfibres

## As a world brand, we have always taken the burden of waste seriously.

Environmental considerations are an integral part of our business practice. We insist and encourage all supply partners to pursue correct environmental practices, especially the recycling of waste materials and the re-circulation of waste heat generated during dyeing.

Numbered bottles represent the equivalent number of 1 litre PET bottles used in the process of making the garment based on size L.

When you no longer need your garment, check its label, contact your local end-of-life textile options to upcycle, and give your garment a second life by preventing landfill. Where indicated, fabrics and trims are suitable for extraction and repurposing.

Cotton-free production avoids growing expensive, environmentally demanding crops without leaching high levels of pesticides and toxic chemicals into the earth and water supplies.

This garment is PFC-Free or PFOA-Free.

PERPETUAL® has developed a unique scalable technology to convert plastic bottles into high quality filament yarn.

Environmentally friendly materials made from recycled PET-bottles offering a sustainable equivalent to conventional yarns.

REPARE® performance recycled fabric uses environmental-friendly materials made from recycled plastic bottles and post-industrial waste.

Eco-Friendly zippers recycled from PET bottles and other post-consumer materials using the latest technology.

Uses unique chemical recycling system where waste clothing and polyester materials are chemically decomposed and reduced.

Where possible, Result Recycled garments use Oeko-Tex certified fabrics which are completely free from harmful chemicals and safe for human use. To attain Oeko-Tex Standard 100 certification, the fabric has been tested and certified to be free from harmful levels of more than 100 substances known to be harmful to human health.

Result Recycled garment production adheres to the Global Recycled Standards: An international, voluntary, full product standard that certifies recycled content, social and environmental practices and chemical restrictions.

100% container efficiency: fully packed 40' high cube containers shipped by rail and sea with close to dock manufacturing and distribution warehousing.

Reduced road miles using full load transport to wholesale distributors only. Consignments are shipped on recycled wooden pallets wrapped in 30% recycled plastic wrap.

## DECORATION PROCESS

**Result®** garments are designed to take decoration with hidden access points to allow for frame or platen purchase on outer fabric. Recommended decoration types have been tested independently and can be taken as an indication as to how the garment may perform. Accuracy or completeness is not guaranteed so before use, the decorator must still determine the suitability of the product for the decoration intended. Printers in particular employ different techniques and use a variety of products so **Result®** does not take responsibility for third party decoration and always recommends testing before bulk decoration.

When garments can be printed onto any colour other than white, extreme caution must be observed.

Due to the engineering of manmade materials, there is a high risk of colour migration through the ink film. This may however be managed by experienced printers with the correct inks. When suggesting digital transfers, customers are encouraged to seek advice from their digital media supplier, whether be it for full colour imagery or simple vinyl CAD cut transfers.

Contact [enquiries@resultclothing.com](mailto:enquiries@resultclothing.com) for further guidance.

## OUR ECOLOGICAL STORY CONTINUES....

Set within a wildlife woodland haven with protected freshwater lagoon, our distribution centre boasts the latest warehousing systems technology and employee programming skills, resulting in better working conditions, increased productivity and increased sustainability.

**Result®** committed to a greener environment.

- Timing sensors for lighting, heating and cooling to reduce energy consumption
- Digital equipment and mobile data capture to reduce paper use
- Full carton ship only, using efficient pallet packaging on weekly, not daily, transport
- Woodland planting to counteract carbon emissions
- Energy saving air recirculation system
- Electrically powered forklift fleet
- Solar powered renewable energy
- Air freight-free
- To minimise flexible packaging in the environment, cardboard packaging, labels and hangtags are made, where possible, from recycled materials. Opaque biodegradable plastic bags ensure garments are kept pristine on their journey but leave no environmental trace.

**Result®**

**Result®** GENUINE RECYCLED  
HAS ALREADY STOPPED THE EQUIVALENT OF OVER  
9 MILLION 1 LITRE BOTTLES FROM LANDFILL.  
WE HOPE TO DOUBLE THIS FIGURE EVERY YEAR.

**Result®** IS A HERITAGE  
BRAND IN THE DECORATION AND UNIFORM  
INDUSTRY WITH CUSTOMERS NAMING OUR  
QUALITY, SERVICE AND PRODUCT SELECTION  
AMONGST THE MANY REASONS WHY THEY  
CHOOSE TO SHOP WITH US AGAIN AND AGAIN.

**A BETTER CHOICE  
FOR IMPROVING THE  
ENVIRONMENT AND  
PROMOTING A MORE  
SUSTAINABLE PLANET**

**Result®**  
GENUINE RECYCLED
